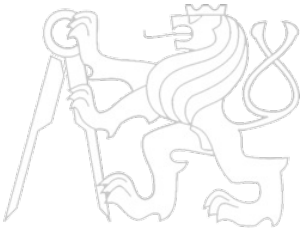
Middleware Architectures 1

Motivation and Course Overview

doc. Ing. Tomáš Vitvar, Ph.D.
tomas@vitvar.com • @TomasVitvar • http://vitvar.com



Czech Technical University in Prague
Faculty of Information Technologies • Software and Web Engineering • http://vitvar.com/courses/mdw

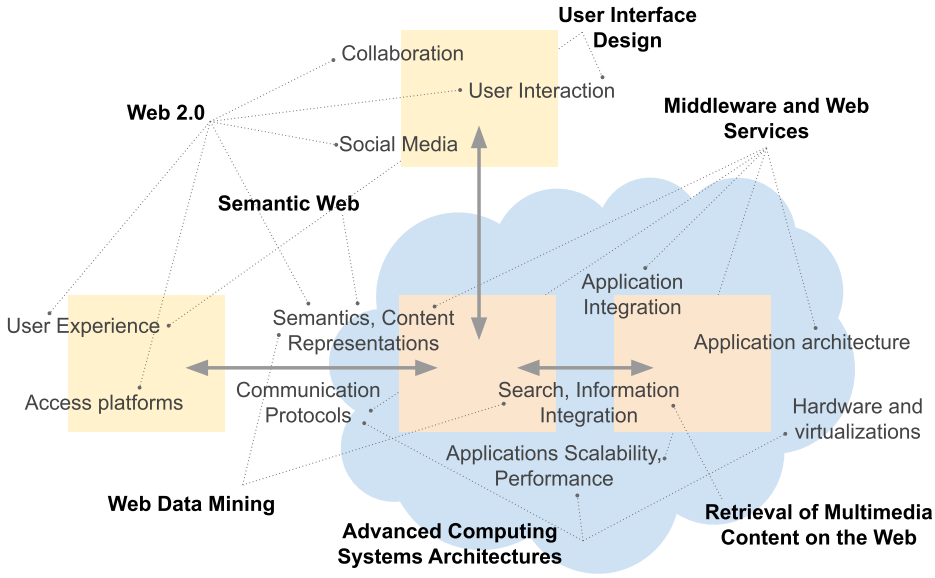
Modified: Sat Sep 19 2020, 17:17:08
Humla v0.3

Hellos

- Tomáš Vitvar – lectures (Czech)
  - *Web engineering curricula chair at CTU FIT*
  - *Technology Architect Director at Oracle*
  - *Research*
    → *Web Intelligence, Semantic Web, Linked Data, Web Services*
  - *Industry*
    → *Large scale integration architecture projects (Vodafone UK, IKEA IT Sweden, Turkish Telecom)*
    → *Design, governance, troubleshooting, performance tuning*
- Jaroslav Kuchař – labs (Czech)
  - *Research assistant at CTU FIT, Seznam.cz*
  - *Web usage mining, big data analytics, Web services*
- Milan Dojčinovski – lectures and labs (English)
  - *research assistant at CTU FIT, Ph.D. candidate*
  - *Semantic Web, Linked Data, NLP, Web services*

Web Engineering Curricula – bird's view

- Web 2.0 engineering is...
  – *far beyond PHP and HTML!*



Overview

- Course at a Glance
  – *Motivation and Scope*
  – *Requirements and Organization*
- Assessment
- Communication and Resources

What is Middleware?

- Say anything you think has something to do with middleware
  - *Architecture*
  - *Tehnology*
  - *Tools*
  - *Concept or style*
  - *Methodology*
  - *...*
  - *No worries, there is no bad answer!*

Motivation in Brief

- Systems rely on complex infrastructures
  - *A lot of data and many processes, internal and external*
  - *As people communicate, underlying systems must too*
  - *But:*
    - *→ variety of data formants, technologies, protocols*
    - *→ variety of architectures, client-server, peer-to-peer, ...*
- Rapid changes in applications' functionalities
  - *modular development*
  - *reuse of application functionality*
  - *low costs – do it now and quickly!*
  - *Good performance*
    - *→ frequent changes in applications' loads, peek hours*
    - *→ scalability – effective load balancing*
    - *→ low costs – cheaper to outsource?*

Scope

- Architectural and conceptual basis
  - *What is architecture – enterprise, processes, data, software*
  - *Service Oriented Architecture, Service Concepts, Middleware*
- Web Service technologies
  - *Details of HTTP and REST*
  - *relation to SOAP*
- Infrastructure and Middleware
  - *Application server*
  - *Performance, Scalability*
- Cloud Architectures

Overview

- Course at a Glance
  - *Motivation and Scope*
  - *Requirements and Organization*
- Assessment
- Communication and Resources

Prerequisites

- Object-oriented programming
  - *Principles*
    - → *class, object, inheritance, encapsulation, ...*
      - → *basis for service concepts*
- Java
  - *All code examples will be in Java*
  - *All lab work will be in Java*
- Web Architecture
  - *Basics of XML, XPath, HTTP, URI*
- Other
  - *Networking*
  - *Regular expressions, basics of Linux*

Organization of Lectures

- 12 Lectures
  - *Czech: Mon 9:15-10:45, T9:107*
  - *English: TBA*
- Plan
  1. *21.09.2020 – Motivation and Course Overview (html)*
  2. *28.09.2020 – public holidays*
  3. *05.10.2020 – Information System Architectures (html)*
  4. *12.10.2020 – Service Architectures and Integration Patterns (html)*
  5. *19.10.2020 – Application Server Architecture 1 (html)*
  6. *26.10.2020 – Application Server Architecture 2 (html)*
  7. *02.11.2020 – Resource-oriented Web Service Architecture (html)*
  8. *09.11.2020 – Web Service Architecture State Model (html)*
  9. *19.11.2020 – Caching, Revalidation, Concurrency Control (html)*
  10. *23.11.2020 – High Availability and Performance (html)*
  11. *30.11.2020 – Event-driven architectures (html)*
  12. *07.12.2020 – Asynchronous integration patterns (html)*
  13. *14.12.2020 – Reserve*

Organization of Labs

- Individual work (no teams!)
- Labs every second week
- Number of labs: 6
  1. *Introduction - Setup, Simple Web Application*
  2. *REST – Basics, development of a REST service*
  3. *REST advanced*
  4. *SOAP Web services*
  5. *Messaging Services - JMS*
  6. *Web Logic Metrics and Load Balancing*

Methodology for Lab Work

- No app development, not directly related assignments
  – *assignment every second week*
  – *be prepared for the lab!*
  – *work alone, ask others for advices*
  – ***Results:***
    → *5 completed tasks*
    → *you will submit results to gitlbab@FIT*

Overview

- Course at a Glance
- Assessment
- Communication and Resources

Assessment

- Labs
  - *Presence is mandatory*
    → *You can miss up to 1 lab without sending regrets*
  - *Every task gives you the maximum of 6 points = 30 points in total*
  - *Activity in labs gives you the maximum of 10 points*
  - *Total maximum points = 40, **to pass**: 20 points minimum*
- Final exam
  - *Written exam: 3 exercises, 1 hour*
    → *each gives you a max. of 20 points, the total is 60 points*
    → *To pass, you need to have at least 50% from each exercise!*
  - *Final score:*
    → *100 points maximum*

Final Marks

Mark	Points	In words
A	100–90	výborně
B	89–80	velmi dobře
C	79–70	dobře
D	69–60	uspokojivě
E	59–50	dostatečně
F	49–0	nedostatečně

Overview

- Course at a Glance
- Assessment
- Communication and Resources

Communication

- Language
  - *Text: English (slides, tweets, posts, instructions, etc.)*
  - *Voice: Czech and English (English version of the course)*
- Direct
  - *you can always contact me directly at tomas@vitvar.com or @TomasVitvar*

About Slides

- Humla – Open Source HTML5 Presentation System
  - *every slide has a unique URL*
  - *all figures linked with Google drawings*
  - *auto-generated PDFs (1 and 2 slides per page) using travis-ci*
  - *running local (with local nodejs-based http server), and in github pages*
  - *Suggest edits or correct errors by pull requests at mdw github repo*
- Keys
  - 1 *default browsing mode*
  - 2 *slideshow mode (automatically scales to fullscreen)*
  - 3 *grid (overview) mode*
  - 4 *print mode, 2 slides per page*
  - ← *slide left*
  - → *slide right*
