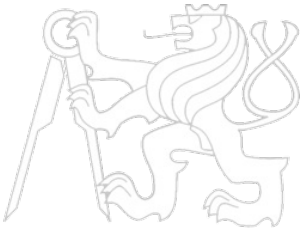
Middleware and Web Services

Motivation and Course Overview

doc. Ing. Tomáš Vitvar, Ph.D.
tomas@vitvar.com • @TomasVitvar • http://vitvar.com



Czech Technical University in Prague
Faculty of Information Technologies • Software and Web Engineering • http://vitvar.com/courses/mdw

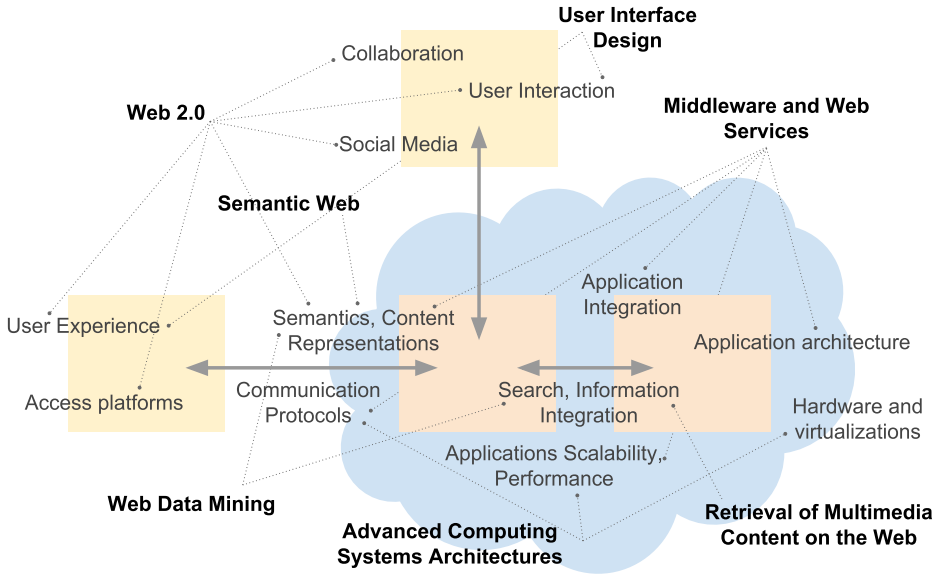
Modified: Tue Apr 11 2017, 10:14:38
Humla v0.3

Hellos

- Tomáš Vitvar
  - *Web Engineering curricula chair, CVUT FIT*
  - *Research - Web Intelligence, Semantic Web, LinkedData, Web Services*
  - *Consulting Technical Director at Oracle*
    → *SOA and Oracle Integration Architectures Consulting Projects (IKEA IT, Vodafone UK, MTN ZA)*
- Jaroslav Kuchař, Milan Dojčinovski
  - *research assistants, Ph.D. students*
  - *Web services, data mining, analytics, Web technologies*

Web Engineering Curricula – bird's view

- Web 2.0 engineering is...
  – *far beyond PHP and HTML!*



Overview

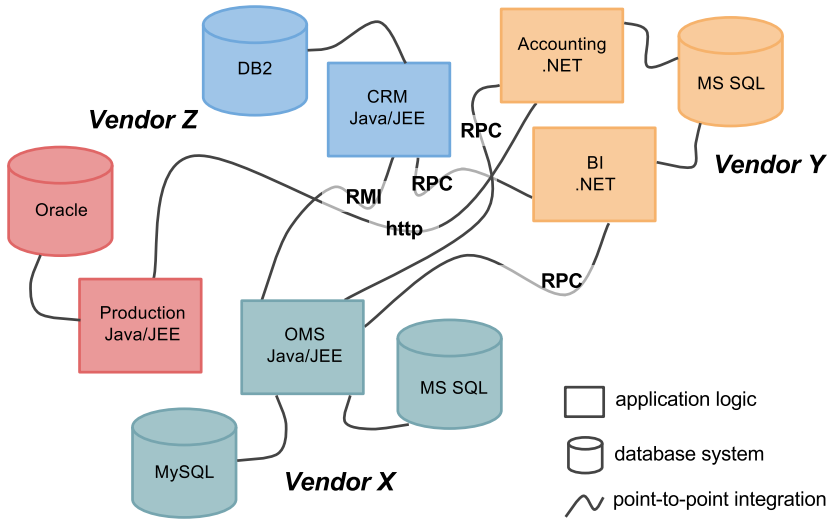
- Course at a Glance
  – *Motivation and Scope*
  – *Requirements and Organization*
- Assessment
- Communication and Resources

Motivation in Brief

- Systems rely on complex infrastructures
  - *A lot of data and many processes, internal and external*
  - *As people communicate, underlying systems must too*
  - *But:*
    - → *variety of data formants, technologies, protocols*
    - → *variety of architectures, client-server, peer-to-peer, ...*
- Good performance
  - *frequent changes in applications' loads, peek hours*
  - *scalability – effective load balancing*
  - *low costs – cheaper to outsource?*
- Rapid changes in applications' functionality
  - *modular development*
  - *reuse of application functionality*
  - *low costs – do it now and quickly!*

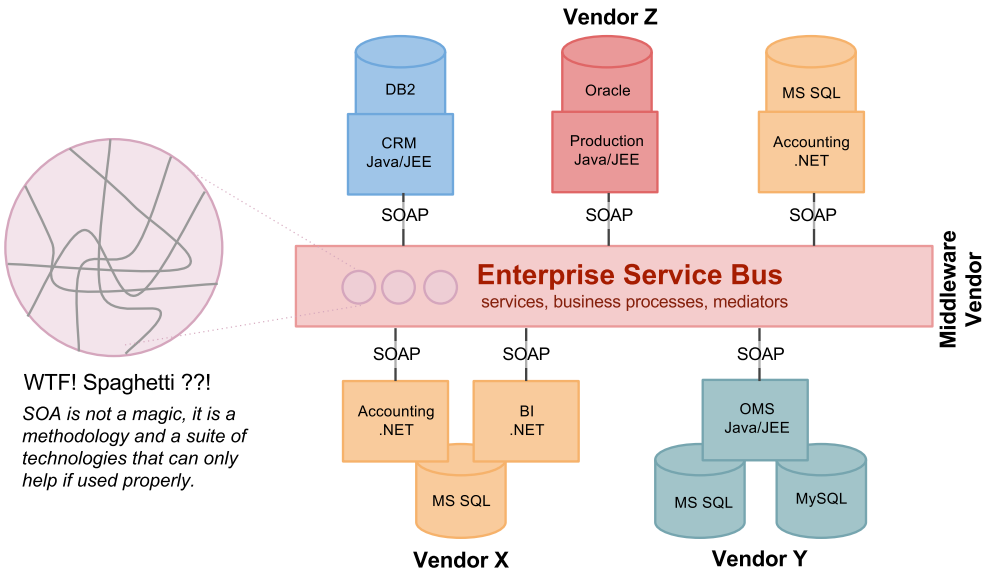
Spaghetti Architecture

- Need for the integration
  - *One-to-one integration*
  - *Hard to maintain, vendor interoperability problem*



SOA Architecture

- Integration organized
  - *Enterprise Service Bus, to be used wisely*



Scope

- Architectural and conceptual basis
  - *What is an architecture – enterprise, processes, data, software*
  - *Service Oriented Architecture, Service Concepts, Middleware, ESB*
- Web Service technologies
  - *Web Service Description Language, SOAP*
  - *Process languages – BPEL/BPMN*
  - *Communication patterns – synchronous, asynchronous, decoupling*
- Middleware
  - *Application server*
  - *Middleware technology for SOA*
  - *Performance, Scalability*

Overview

- Course at a Glance
  - *Motivation and Scope*
  - *Requirements and Organization*
- Assessment
- Communication and Resources

Prerequisites

- Object-oriented programming
  - *Principles*
    - → *class, object, inheritance, encapsulation, ...*
      - → *basis for service concepts*
- Java
  - *All code examples will be in Java*
  - *All lab work will be in Java*
- Web Architecture
  - *Basics of XML, XPath, HTTP, URI*
- Other
  - *Networking*
  - *Regular expressions, basics of Linux*

Organization of Lectures

- 13 Lectures
  - *Czech: Mon 7:15-8:45, T9:155*
  - *English: TBA*
- Plan
  1. *05.10.2015 – Motivation and Course Overview (html)*
  2. *05.10.2015 – Introduction to Application Server (html)*
  3. *12.10.2015 – Introduction to Architectures (html)*
  4. *19.10.2015 – Application Protocols (html)*
  5. *26.10.2015 – Application Server Services (html)*
  6. *02.11.2015 – Messaging Systems (html)*
  7. *09.11.2015 – High Availability and Performance (html)*
  8. *16.11.2015 – Service Concepts (html)*
  9. *23.11.2015 – SOAP and REST (html)*
  10. *30.11.2015 – Web Service Description Language (html)*
  11. *07.12.2015 – Enterprise Service Bus (html)*
  12. *14.12.2015 – Service Orchestration (html)*
  13. *04.01.2016 – Reserve/Exam*

Organization of Labs

- Individual work (no teams!)
- Labs every second week
- Number of labs: 5
  1. *Introduction, Setup*
  2. *WebLogic Server, application*
  3. *Service design, implementation, wsdl, soap, soapui*
  4. *Oracle Service Bus, Web service integration*
  5. *Interoperability, transformation*

Methodology for Lab Work

- No app development, not directly related assignments
  - *assignment every second week*
  - *be prepared for the lab!*
  - *work alone, ask others for advices*
  - ***Results:***
    - → *5 completed tasks*
    - → *documentation (in the wiki)*
    - → *implementation (code in the source tracker)*

Development Platform

- WebLogic Server
  - *JEE development environment*
- Oracle Service Bus
  - *Oracle Middleware platform*
  - *Runs on WebLogic Server*
  - *You use scripts to install it and run it*

Overview

- Course at a Glance
- Assessment
- Communication and Resources

Assessment

- Labs
  - *Presence is mandatory*
    → *You can miss up to 1 lab without sending regrets*
  - *Every task gives you a max. of* 6 *points*
  - $6 \cdot 5 = 30$ *points*
  - *Activity in labs gives you a max. of* 10 *points*
  - *Total maximal points:* $p_p = 40$, ***to pass***: $p_p \geq 20$
- Final exam
  - *Written exam: 3 exercises, 1 hour*
    → *each gives you a max. of* 20 *points, the total* $p_t = 60$ *points*
    → *To pass, you need to have at least* 50% *from each exercise!*
  - *Final score:*
    → $p_p + p_t$ 100 *maximum points*

Final Marks

Mark	Points	In words
A	100–90	výborně
B	89–80	velmi dobře
C	79–70	dobře
D	69–60	uspokojivě
E	59–50	dostatečně
F	49–0	nedostatečně

Overview

- Course at a Glance
- Assessment
- Communication and Resources

Communication

- Language
  - *Text: English (slides, tweets, posts, instructions, etc.)*
    → choose English/Czech for your contributions to the wiki
  - *Voice: Czech and English (English version of the course)*
- Direct
  - *you can always contact me directly at tomas@vitvar.com or @TomasVitvar*

About Slides

- Humla – Open Source HTML5 Presentation Environment
  - *every slide has a unique URL*
  - *all figures linked with Google drawings*
  - *possible to format and print in PDF*
  - *running local, with back-end NodeJS support, and offline*
  - *Fork it at Humla github repo*
- Keys
  - `1` *default browsing mode*
  - `2` *slideshow mode (automatically scales to fullscreen)*
  - `3` *grid (overview) mode*
  - `4` *print mode, 2 slides per page*
  - `←` *slide left*
  - `→` *slide right*
  - `d` *debug mode*
  - `e` *toggle last error messages on/off*
