

# Middleware and Web Services

## Motivation and Course Overview

**doc. Ing. Tomáš Vitvar, Ph.D.**

tomas@vitvar.com • @TomasVitvar • <http://vitvar.com>

Czech Technical University in Prague

Faculty of Information Technologies • Software and Web Engineering • <http://vitvar.com/courses/mdw>

Modified: Sun Sep 30 2018, 21:19:05  
Humla v0.3

## Hellos

- **Tomáš Vitvar – lectures (Czech)**
  - *Web engineering study programme chair at CTU FIT*
  - *Technology Architect Director at Oracle*
  - *Research*
    - *Web Intelligence, Semantic Web, Linked Data, Web Services*
  - *Industry*
    - *Large scale integration architecture projects (Vodafone UK, IKEA IT Sweden, Turkish Telecom)*
    - *Design, governance, troubleshooting, performance tuning*
- **Jaroslav Kuchař – labs (Czech)**
  - *Research assistant at CTU FIT, Seznam.cz*
  - *Web usage mining, big data analytics, Web services*
- **Milan Dojčinovski – lectures and labs (English)**
  - *research assistant at CTU FIT, Ph.D. candidate*
  - *Semantic Web, Linked Data, NLP, Web services*

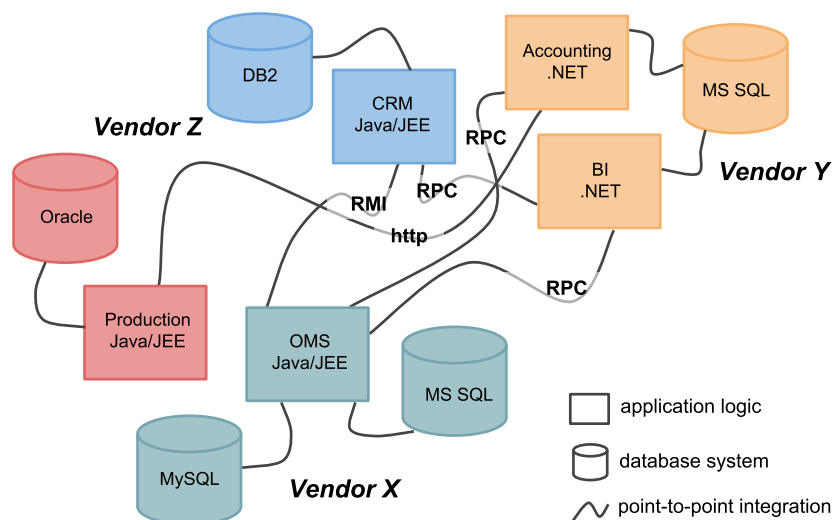

## Motivation in Brief

- Systems rely on complex infrastructures
  - *A lot of data and many processes, internal and external*
  - *As people communicate, underlying systems must too*
  - *But:*
    - *variety of data formants, technologies, protocols*
    - *variety of architectures, client-server, peer-to-peer, ...*
- Good performance
  - *frequent changes in applications' loads, peak hours*
  - *scalability – effective load balancing*
  - *low costs – cheaper to outsource?*
- Rapid changes in applications' functionality
  - *modular development*
  - *reuse of application functionality*
  - *low costs – do it now and quickly!*

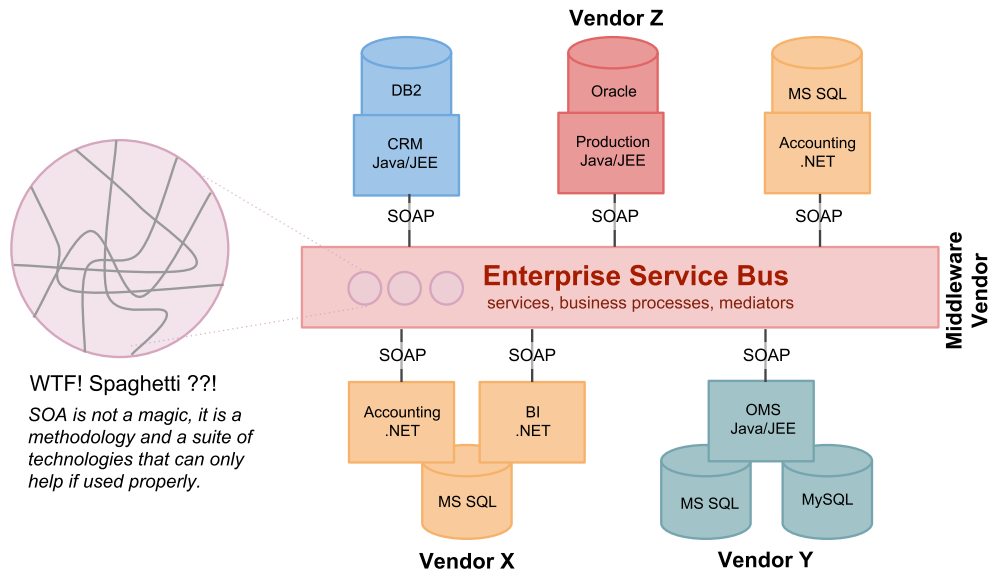

## Spaghetti Architecture

- Need for the integration
  - *One-to-one integration*
  - *Hard to maintain, vendor interoperability problem*

# SOA Architecture

- Integration organized
  - *Enterprise Service Bus, to be used wisely*

## Scope

- Architectural and conceptual basis
  - *What is architecture – enterprise, processes, data, software*
  - *Service Oriented Architecture, Service Concepts, Middleware*
- Web Service technologies
  - *Details of HTTP and REST, SOAP*
  - *Web Service Description Language (WSDL)*
- Infrastructure and Middleware
  - *Performance, Scalability*
  - *Application server*
- Cloud
  - *Microservices, Docker*

## Overview

- Course at a Glance
  - *Motivation and Scope*
  - *Requirements and Organization*
- Assessment
- Communication and Resources

## Prerequisites

- Object-oriented programming
  - *Principles*
    - *class, object, inheritance, encapsulation, ...*
    - *basis for service concepts*
- Java
  - *All code examples will be in Java*
  - *All lab work will be in Java*
- Web Architecture
  - *Basics of XML, XPath, HTTP, URI*
- Other
  - *Networking*
  - *Regular expressions, basics of Linux*

## Organization of Lectures

- 12 Lectures
  - Czech: Mon 9:15-10:45, TK:BS
  - English: TBA
- Plan
  1. 01.10.2018 – Motivation and Course Overview ([html](#))
  2. 08.10.2018 – Introduction to Architectures ([html](#))
  3. 15.10.2018 – Service Architecture and Technologies 1 ([html](#))
  4. 22.10.2018 – Service Architecture and Technologies 2 ([html](#))
  5. 29.10.2018 – Service Architecture and Technologies 3 ([html](#))
  6. 05.11.2018 – Application Server 1 ([html](#))
  7. 12.11.2018 – Application Server 2 ([html](#))
  8. 19.11.2018 – Messaging Systems ([html](#))
  9. 26.11.2018 – High Availability and Performance 1 ([html](#))
  10. 03.12.2018 – High Availability and Performance 2 ([html](#))
  11. 10.12.2018 – Cloud Architectures ([html](#))
  12. 17.12.2018 – Microservices and Docker ([html](#))

## Organization of Labs

- Individual work (no teams!)
- Labs every second week
- Number of labs: 6
  1. Introduction - Setup, Simple Web Application
  2. REST – Basics, development of a REST service
  3. REST advanced
  4. SOAP Web services
  5. Messaging Services - JMS
  6. Web Logic Metrics and Load Balancing

## Methodology for Lab Work

- No app development, not directly related assignments
  - *assignment every second week*
  - *be prepared for the lab!*
  - *work alone, ask others for advices*
  - **Results:**
    - *5 completed tasks*
    - *you will submit results to [gitlbab@FIT](mailto:gitlbab@FIT)*

## Overview

- Course at a Glance
- **Assessment**
- Communication and Resources

## Assessment

- Labs
  - Presence is mandatory
    - You can miss up to 1 lab without sending regrets
  - Every task gives you the maximum of 5 points
  - $5 \cdot 5 = 25$  points
  - Activity in labs gives you the maximum of 15 points
  - Total maximum points:  $p_p = 40$ , **to pass**:  $p_p \geq 20$
- Final exam
  - Written exam: 3 exercises, 1 hour
    - each gives you a max. of 20 points, the total  $p_t = 60$  points
    - To pass, you need to have at least 50% from each exercise!
  - Final score:
    - $p_p + p_t = 100$  maximum points

## Final Marks

Mark	Points	In words
A	100–90	výborně
B	89–80	velmi dobře
C	79–70	dobře
D	69–60	uspokojivě
E	59–50	dostatečně
F	49–0	nedostatečně

## Overview

- Course at a Glance
- Assessment
- **Communication and Resources**

## Communication

- Language
  - *Text: English (slides, tweets, posts, instructions, etc.)*
  - *Voice: Czech and English (English version of the course)*
- Direct
  - *you can always contact me directly at [tomas@vitvar.com](mailto:tomas@vitvar.com) or [@TomasVitvar](https://twitter.com/TomasVitvar)*

# About Slides

- Humla – Open Source HTML5 Presentation System
  - every slide has a unique URL
  - all figures linked with Google drawings
  - auto-generated PDFs (1 and 2 slides per page) using travis-ci
  - running local (with local nodejs-based http server), and in github pages
  - Suggest edits or correct errors by pull requests at [mdw github repo](#)

- Keys

- 1 default browsing mode
- 2 slideshow mode (automatically scales to fullscreen)
- 3 grid (overview) mode
- 4 print mode, 2 slides per page
- ← slide left
- slide right
