What is Middleware?

- Say anything you think has something to do with middleware
 - *Architecture*
 - *Tehnology*
 - *Tools*
 - *Concept or style*
 - *Methodology*
 - ...
 - *No worries, there is no bad answer!*

Motivation in Brief

- Systems rely on complex infrastructures
 - *A lot of data and many processes, internal and external*
 - *As people communicate, underlying systems must too*
 - *But:*
 - *variety of data formants, technologies, protocols*
 - *variety of architectures, client-server, peer-to-peer, ...*
- Rapid changes in applications' functionalities
 - *modular development*
 - *reuse of application logic*
 - *low costs – do it now and quickly!*
 - *Good performance*
 - *frequent changes in applications' loads, peak hours*
 - *scalability – effective load balancing*
 - *low costs – cheaper to outsource?*

Scope

- Architectural and conceptual basis
 - *What is architecture – enterprise, processes, data, software*
 - *Service concepts, integration patterns, middleware*
- Backend technologies
 - *Communication protocols – HTTP, TLS, HTTP/2*
 - *Application backend and requests handling*
 - *Advances of REST, gRPC*
- Performance and Scalability
 - *Performance tuning*
 - *Load balancers*

- Communication and Resources

Assessment

- Labs
 - *Every task gives you the maximum of 6 points = 30 points in total*
 - *Activity in labs gives you the maximum of 10 points*
 - *Total maximum points = 40, **to pass**: 20 points minimum*
- Final exam
 - *Written exam: 3 exercises, 1 hour*
 - *each gives you a max. of 20 points, the total is 60 points*
