

Middleware and Web Services

Motivation and Course Overview

doc. Ing. Tomáš Vitvar, Ph.D.

tomas@vitvar.com • @TomasVitvar • <http://vitvar.com>

Czech Technical University in Prague

Faculty of Information Technologies • Software and Web Engineering • <http://vitvar.com/courses/mdw>

Modified: Sun Sep 30 2018, 21:19:05
Humla v0.3

Hellos

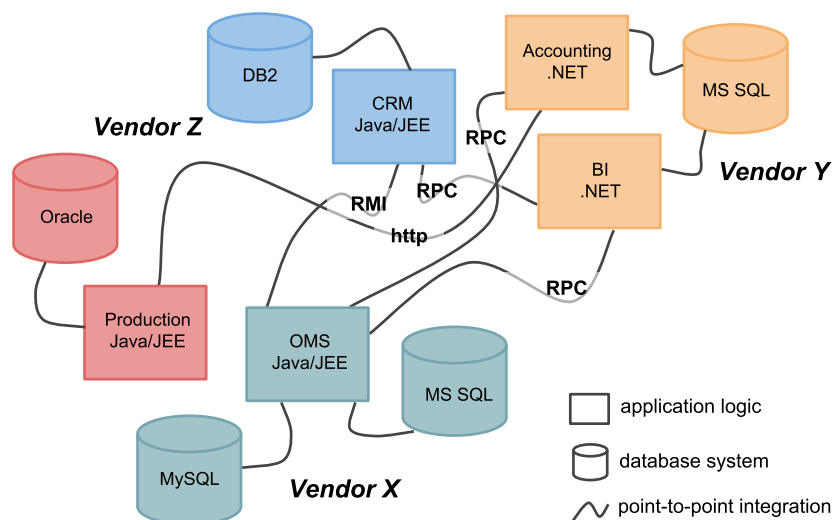

- **Tomáš Vitvar – lectures (Czech)**
 - *Web engineering study programme chair at CTU FIT*
 - *Technology Architect Director at Oracle*
 - *Research*
 - *Web Intelligence, Semantic Web, Linked Data, Web Services*
 - *Industry*
 - *Large scale integration architecture projects (Vodafone UK, IKEA IT Sweden, Turkish Telecom)*
 - *Design, governance, troubleshooting, performance tuning*
- **Jaroslav Kuchař – labs (Czech)**
 - *Research assistant at CTU FIT, Seznam.cz*
 - *Web usage mining, big data analytics, Web services*
- **Milan Dojčinovski – lectures and labs (English)**
 - *research assistant at CTU FIT, Ph.D. candidate*
 - *Semantic Web, Linked Data, NLP, Web services*

Motivation in Brief

- Systems rely on complex infrastructures
 - *A lot of data and many processes, internal and external*
 - *As people communicate, underlying systems must too*
 - *But:*
 - *variety of data formants, technologies, protocols*
 - *variety of architectures, client-server, peer-to-peer, ...*
- Good performance
 - *frequent changes in applications' loads, peak hours*
 - *scalability – effective load balancing*
 - *low costs – cheaper to outsource?*
- Rapid changes in applications' functionality
 - *modular development*
 - *reuse of application functionality*
 - *low costs – do it now and quickly!*

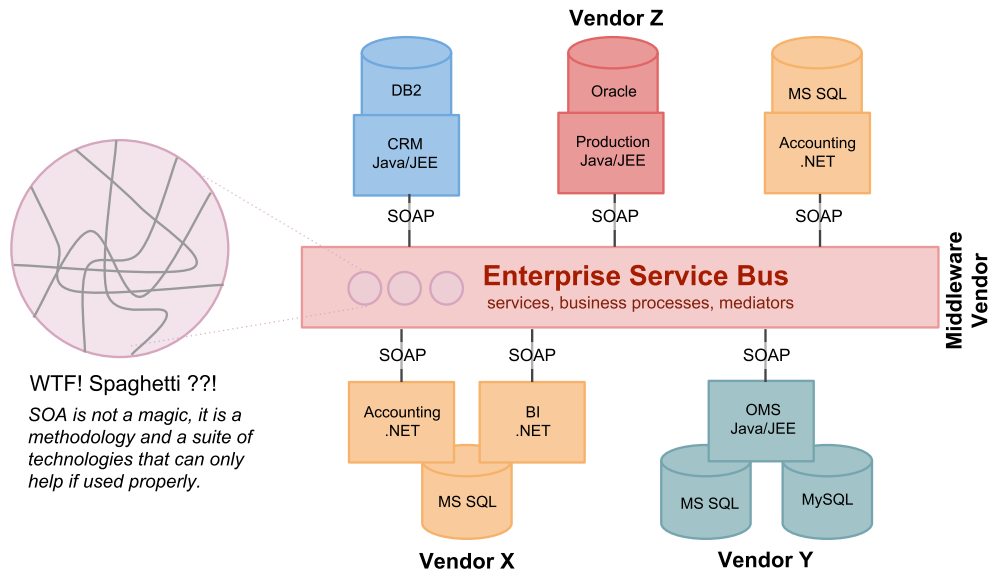

Spaghetti Architecture

- Need for the integration
 - *One-to-one integration*
 - *Hard to maintain, vendor interoperability problem*

SOA Architecture

- Integration organized
 - *Enterprise Service Bus, to be used wisely*

Scope

- Architectural and conceptual basis
 - *What is architecture – enterprise, processes, data, software*
 - *Service Oriented Architecture, Service Concepts, Middleware*
- Web Service technologies
 - *Details of HTTP and REST, SOAP*
 - *Web Service Description Language (WSDL)*
- Infrastructure and Middleware
 - *Performance, Scalability*
 - *Application server*
- Cloud
 - *Microservices, Docker*

Overview

- Course at a Glance
 - *Motivation and Scope*
 - *Requirements and Organization*
- Assessment
- Communication and Resources

Prerequisites

- Object-oriented programming
 - *Principles*
 - *class, object, inheritance, encapsulation, ...*
 - *basis for service concepts*
- Java
 - *All code examples will be in Java*
 - *All lab work will be in Java*
- Web Architecture
 - *Basics of XML, XPath, HTTP, URI*
- Other
 - *Networking*
 - *Regular expressions, basics of Linux*

Organization of Lectures

- 12 Lectures
 - Czech: Mon 9:15-10:45, TK:BS
 - English: TBA
- Plan
 1. 01.10.2018 – Motivation and Course Overview ([html](#))
 2. 08.10.2018 – Introduction to Architectures ([html](#))
 3. 15.10.2018 – Service Architecture and Technologies 1 ([html](#))
 4. 22.10.2018 – Service Architecture and Technologies 2 ([html](#))
 5. 29.10.2018 – Service Architecture and Technologies 3 ([html](#))
 6. 05.11.2018 – Application Server 1 ([html](#))
 7. 12.11.2018 – Application Server 2 ([html](#))
 8. 19.11.2018 – Messaging Systems ([html](#))
 9. 26.11.2018 – High Availability and Performance 1 ([html](#))
 10. 03.12.2018 – High Availability and Performance 2 ([html](#))
 11. 10.12.2018 – Cloud Architectures ([html](#))
 12. 17.12.2018 – Microservices and Docker ([html](#))

Organization of Labs

- Individual work (no teams!)
- Labs every second week
- Number of labs: 6
 1. Introduction - Setup, Simple Web Application
 2. REST – Basics, development of a REST service
 3. REST advanced
 4. SOAP Web services
 5. Messaging Services - JMS
 6. Web Logic Metrics and Load Balancing

Methodology for Lab Work

- No app development, not directly related assignments
 - *assignment every second week*
 - *be prepared for the lab!*
 - *work alone, ask others for advices*
 - **Results:**
 - *5 completed tasks*
 - *you will submit results to gitlbab@FIT*

Overview

- Course at a Glance
- **Assessment**
- Communication and Resources

Assessment

- Labs
 - Presence is mandatory
 - You can miss up to 1 lab without sending regrets
 - Every task gives you the maximum of 5 points
 - $5 \cdot 5 = 25$ points
 - Activity in labs gives you the maximum of 15 points
 - Total maximum points: $p_p = 40$, **to pass**: $p_p \geq 20$
- Final exam
 - Written exam: 3 exercises, 1 hour
 - each gives you a max. of 20 points, the total $p_t = 60$ points
 - To pass, you need to have at least 50% from each exercise!
 - Final score:
 - $p_p + p_t$ 100 maximum points

Final Marks

Mark	Points	In words
A	100–90	výborně
B	89–80	velmi dobře
C	79–70	dobře
D	69–60	uspokojivě
E	59–50	dostatečně
F	49–0	nedostatečně

Overview

- Course at a Glance
- Assessment
- **Communication and Resources**

Communication

- Language
 - *Text: English (slides, tweets, posts, instructions, etc.)*
 - *Voice: Czech and English (English version of the course)*
- Direct
 - *you can always contact me directly at tomas@vitvar.com or [@TomasVitvar](https://twitter.com/TomasVitvar)*

About Slides

- Humla – Open Source HTML5 Presentation System
 - every slide has a unique URL
 - all figures linked with Google drawings
 - auto-generated PDFs (1 and 2 slides per page) using travis-ci
 - running local (with local nodejs-based http server), and in github pages
 - Suggest edits or correct errors by pull requests at [mdw github repo](#)

- Keys

- 1 default browsing mode
- 2 slideshow mode (automatically scales to fullscreen)
- 3 grid (overview) mode
- 4 print mode, 2 slides per page
- ← slide left
- slide right
