What is Middleware?

- Say anything you think has something to do with middleware
 - *Architecture*
 - *Tehnology*
 - *Tools*
 - *Concept or style*
 - *Methodology*
 - ...
 - *No worries, there is no bad answer!*

Motivation in Brief

- Systems rely on complex infrastructures
 - *A lot of data and many processes, internal and external*
 - *As people communicate, underlying systems must too*
 - *But:*
 - *variety of data formants, technologies, protocols*
 - *variety of architectures, client-server, peer-to-peer, ...*
- Rapid changes in applications' functionalities
 - *modular development*
 - *reuse of application functionality*
 - *low costs – do it now and quickly!*
 - *Good performance*
 - *frequent changes in applications' loads, peek hours*
 - *scalability – effective load balancing*
 - *low costs – cheaper to outsource?*

Scope

- Architectural and conceptual basis
 - *What is architecture – enterprise, processes, data, software*
 - *Service Oriented Architecture, Service Concepts, Middleware*
- Web Service technologies
 - *Details of HTTP and REST*
 - *relation to SOAP*
- Infrastructure and Middleware
 - *Application server*
 - *Performance, Scalability*
- Cloud Architectures
